Bachelor's degree in Computer and Information technology from Future University in Egypt (FUE) (2019–2023)
Route Full stack diploma Sep 2023 - Aug 2024

PROJECTS

E-commerce App:

E-commerce app with seamless integration with Route Academy e-commerce API. Using React.js and React Router Dom, I created an intuitive UI for easy navigation. Implemented secure user authentication for personalized experiences, including individual shopping carts and wishlists

Yummy Meal App:

Meal app that shows you meals according to their categories, and areas or by searching using mealDB API, shows you the Ingredients of a meal and lets you go to YouTube to see a live video of that meal being cooked.

Free Games App:

Free Games is an application that displays a collection of free PC games available on platforms such as Steam, Epic Games, and other websites, along with relevant download links. Additionally, it provides information on browser-based computer games that you can play live in your web browser provides information on browser-based computer games that you can play live in your web browser

Saraha App Clone:

A Sarah App Clone replicates the original Sarah app, a platform where users can send and receive anonymous messages. Building this copy using the MVC design pattern makes it easier to manage and organize the project

E-commerce Node.js:

An e-commerce database built with Node.js and MongoDB is designed to store and manage all the data needed to run an online store.
Documentation: https://documenter.getpostman.com/view/32813656/2sA3s3GBEc

Library-Management-System Node.js:

A library management system is a database that stores information about books, authors, patrons, and Book rental
Documentation: https://documenter.getpostman.com/view/32813656/2sA3rwNEh8

Job Search App Node.js:

A comprehensive job search application built with Node.js, designed to facilitate seamless interaction between companies and job seekers. The app features dual functionality: enabling company HRs to post job openings and allowing users to search for jobs and companies and apply for available positions efficiently.
Documentation: https://documenter.getpostman.com/view/32813656/2sA3e1BqDJ

SKILLS

Frontend: HTML, CSS, Js, Ts, React
Backend: Node.js, Nest.ts , MongoDB, Docker
